PROFILE

Graduating Software Engineering student (ISSAT Sousse) with hands-on full-stack, mobile, and DevOps development experience gained across three internships, and a genuine enthusiasm for AI and computer vision. Built a React Native on-demand delivery platform integrating an AI assistant (Groq LLM) and an ML microservice for driver verification, with automated CI/CD pipelines, a NestJS/Next.js ERP and e-commerce system, and a MERN-based bidding platform. Comfortable working across the stack and looking for a role where I can keep building and learning.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Java, C, C++, Python, MATLAB, SQL
Mobile:	React Native, Java, Kotlin, Google Play deployment
Frontend:	React, Next.js, shadcn/ui, HTML/CSS
Backend:	Node.js, Express, NestJS, Spring Boot, .NET, Prisma ORM
Databases:	MongoDB, MySQL, PostgreSQL
DevOps & Tools:	Git/GitHub, GitHub Actions, Bitrise, Docker, Vitest
AI & ML:	Groq LLM (Llama-3.3-70B), ML microservices, Computer Vision
Payments:	Stripe, Konnect, Flouci

PROFESSIONAL EXPERIENCE

Software Engineering Intern (PFE) — A.Solutions (Local Smart Delivery) Feb 2026 – Jun 2026

- Designed and built "Local Smart Delivery," an on-demand P2P delivery platform (React Native) with driver verification, a coin-based in-app economy, and an AI-powered support assistant.
- Implemented an in-app digital wallet to top up, manage, and spend coin balance; integrated a Groq LLM (Llama-3.3-70B) conversational assistant for in-app support.
- Designed a dedicated Machine Learning microservice for automated driver verification.
- Set up and visualized CI/CD pipelines (GitHub Actions, Bitrise) automating build, test, and deploy to Google Play.
- Evaluated payment gateways (Konnect/Flouci local, Stripe international) and researched Estonian e-Residency vs. UK Ltd structures around regional restrictions.
- Live: admin.localsmartdelivery.com and on the Google Play Store (closed testing).

Full-Stack Development Intern (PFA) — Amirez (ERP & E-commerce) 2 months, 2025

- Built a full-stack ERP and e-commerce platform: NestJS + Prisma backend, Next.js (TypeScript) + shadcn/ui frontend.
- Implemented automated testing with Vitest for reliability across core modules.

Full-Stack Development Intern (PFA) — SAFI Industriel (Bidding Platform) 1 month, 2024

- Developed a full-stack bidding/auction platform (MERN) split into a dedicated client and API, and deployed it to production.

Freelance Full-Stack Developer — ERP Systems (Self-Employed) Aug 2024 – Aug 2025

- Specialized in building ERP systems for clients using Next.js, NestJS, and PostgreSQL.

ACADEMIC PROJECTS

- Student Management System** — Full-stack web application (Spring Boot + React) for managing student records.
- Ship Cabin Management System** — Desktop application (JavaFX + MySQL) for managing ship cabin bookings, including report printing.

EDUCATION

National Diploma in Computer Engineering — Software Engineering (2021 – 2026)
ISSAT Sousse, Tunisia. 2021–2022: Preparatory Cycle | 2022–2026: Engineering Cycle, Software Engineering.

ACHIEVEMENTS & CERTIFICATIONS

Hackathon Problem-Solving — Ranked Top 300 worldwide	2023
MATLAB Skills — 1st Prize Winner, High School Projects, Sousse	2023
Next-Generation Networks Certification — ISSAT Sousse	2024
Network Security Certification — ISSAT Sousse	2024
Service Virtualization and Cloud Computing Certification — ISSAT Sousse	2025
Big Data Certification — ISSAT Sousse	2026

LEADERSHIP & COMMUNITY

- Gold Member — IEEE ISSATso Student Branch (2021–2022) — Drove 200%+ membership growth via a campus outreach plan; managed records and meetings.
- Leader & Manager — Freelance Team (2022–2025) — Founded and led a team (2!5 members) in dropshipping, digital marketing, and content creation.
- Volunteer Developer — Charity Organization (2026) — Built a live website with dashboard for a charity organization (jam3iya.org).
