# AHMED AZIZ MEHREZ

DevOps & Full-Stack Engineer | Node.js/Express · React Native · MongoDB/MySQL · Elasticsearch · AWS/Azure · CI/CD

**Address:** Tunis, Tunisia
**Phone:** +216 21 838 333
**Email:** azizmehrez12@gmail.com
**Portfolio:** azizmehrez.com
**GitHub:** github.com/MehrezAziz

## PROFILE

DevOps and full-stack engineer with 3 years of experience shipping and running production applications end to end: Node.js/Express back ends with MongoDB, MySQL and Elasticsearch, React Native and responsive web front ends, and the pipelines and infrastructure behind them (Docker, Kubernetes, AWS, Azure, Linux, GitHub Actions, Bitrise). Tech Lead & Managing Director of Amirez since April 2025, leading and mentoring a team of developers through code reviews, Scrum and clear engineering standards. I enjoy taking a live MVP and making it fast, stable and bug-free through automation, monitoring and steady iteration. My next step: own the DevOps and full-stack foundations of an early-stage startup and grow with it.

## PROFESSIONAL EXPERIENCE

**Tech Lead & Managing Director** *Apr 2025 – Present*

*Amirez — Leading the development team and the marketing team*

### Technical leadership

- Lead a development team in 2-week Scrum sprints: backlog, estimation in story points, sprint planning, reviews and retrospectives.
- Own architecture and technical decisions, code reviews, code quality standards and the CI/CD pipelines that deliver regular client releases.
- Translate client business requirements into technical specifications, user stories with acceptance criteria and data models.
- Mentor developers and allocate tasks according to each profile; track progress in Jira and Trello.

### Marketing

- Run the company's Meta Ads campaigns and track KPIs (CTR, CPC, CPA, ROAS) with regular performance reports.

**Freelance Full-Stack Developer & Digital Marketing Specialist** *Feb 2024 – Apr 2025*

- Built and deployed an ERP and complete e-commerce stores for business clients, from requirements analysis to production.
- Integrated Meta Pixel tracking to measure conversions and ran Facebook Ads campaigns for clients.

**Software Engineering Intern** *5 months*

*A.Solutions — Local Smart Delivery, on-demand delivery platform (live)*

- Designed and shipped a peer-to-peer delivery platform as a React Native mobile app, covering users, delivery requests, courier verification and an internal coin economy.
- Built CI/CD pipelines (GitHub Actions, Bitrise) automating build, tests and deployment of the mobile app to Google Play.
- Implemented the digital wallet logic: coin top-ups, balance management and spending.
- Evaluated local and international payment gateways (Konnect and Flouci locally, Stripe internationally) for the coin economy.
- Integrated an LLM-powered support assistant (Groq API, Llama-3.3-70B) into the app and designed a Python machine-learning microservice for automatic courier verification.
- Produced UML diagrams and technical documentation for the platform.
- Live: admin console (admin.localsmartdelivery.com) and Google Play app (closed testing); still managing the platform for the company today.

**Full-Stack Developer Intern** *2 months*

*SAFI Industriel — ERP & E-commerce Platform*

- Designed the relational data model with Prisma ORM (schemas and relations) covering both the ERP and the e-commerce domains.
- Built a modular NestJS back end (modules, controllers, services) exposing the REST APIs consumed by the web application.

- Developed the Next.js (TypeScript) front end with reusable shadcn/ui components for the back office and the online store.
- Wrote automated tests with Vitest on the core modules to secure the business logic and prevent regressions.
- Delivered features end to end, from business requirement to data model, API, user interface and tests.

**Full-Stack Developer Intern** *1 month*

*SAFI Industriel — Online Auction Platform*

- Designed and built a full-stack auction platform on the MERN stack, structured as two separate applications: a React client and a Node.js/Express REST API.
- Modelled users, auctions and bids in MongoDB and implemented the API endpoints to publish items, browse auctions and place bids.
- Implemented the core bidding rules on the server side, such as validating that each new bid is higher than the current highest bid.
- Built the React interface for browsing auctions and bidding, then deployed the client and the API to production.

## SKILLS

**DevOps & cloud:** Docker, Kubernetes, AWS, Microsoft Azure, Linux, Bash, CI/CD (GitHub Actions, Bitrise), Git/GitHub

**Back-end & APIs:** Node.js, Express, NestJS, REST APIs, GraphQL, Prisma ORM, Spring Boot, .NET

**Databases & search:** MongoDB, MySQL, PostgreSQL, Elasticsearch, Neo4j

**Front-end & mobile:** React Native, React, Next.js, Bootstrap, EJS templates, HTML/CSS, TypeScript, JavaScript

**Design tools:** Figma, Photoshop, Illustrator, Canva

**Quality:** Automated testing (Vitest), code reviews, technical documentation, UML

**AI & LLM engineering:** LLM integration (Llama-3.3-70B), LangChain, agentic AI workflows, AI coding tools (Cursor, Claude Code)

**Leadership & methods:** Scrum, mentoring junior developers, backlog management

## EDUCATION

**National Engineering Diploma in Computer Science — Software Engineering** *5 years*

*ISSAT Sousse (Higher Institute of Applied Sciences and Technology of Sousse), Tunisia — Master's level*

## LANGUAGES

**French:** Bilingual (second native language)

**English:** Full professional proficiency

## CERTIFICATIONS & ACHIEVEMENTS

**Service Virtualisation & Cloud Computing Certification — ISSAT Sousse**

**Big Data Certification — ISSAT Sousse**

**Problem-Solving Hackathon — ranked in the global Top 300** *2023*

## LEADERSHIP

**Founder & Team Leader — Online Sales & Trading Freelance Team** *Sept 2022 – Dec 2025*

- Founded and led a freelance team specialised in dropshipping, digital marketing and content creation, growing it from 2 to 5 members.

**Gold Member — IEEE ISSATso Student Branch** *Sept 2021 – Aug 2022*

- Executed a campus outreach plan that grew the branch's membership by more than 200%.

**Volunteer Developer — Charity Organisation** *Mar 2026*

- Built the organisation's website (live: jam3iya.org).
